Terms of the contract

Price for 300 SCNC is 1 Ethereum decimals 18 (so every byer can get 1 or 0.1 SCNC).
Depositor can get tokens at 20% discount.
To deposit Ethereum in a contract an investor has to call a function *deposit* (use ABI / JSON Interface).
To refund Ethereum from contract before 28.02.2018 an investor has to call a function *refund* (use ABI / JSON Interface).
To get a tokens at 20% discount, depositor has to call a function *Invest* (use ABI / JSON Interface).
After 28.02.2018 the *invest* function cannot be called. All depositors have to call a function *refund* to take back Ethereum on their personal wallets.
During the period from calling function *deposit* to *refund* or *invest* all Ethereum is collected on the contract's address.

When the Ethereum is received on contract's address without calling a function *deposit*, the investor's wallet will receive tokens automatically without 20% discount. Funds will be collected on the address of the contract owner.

When depositor calls the function *Invest* - depositor's wallet will receive tokens automatically at 20% discount. Funds will be collected on the address of the contract owner.

All depositors' funds will be frozen on the contract's address so that no one could not use it before the functions *refund* or *invest* are called. Only depositors are able to call contract functions.
